Best solution
Better integration

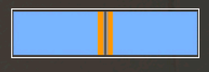
BIPV PLASTERED

PV Panel

MATERIALS

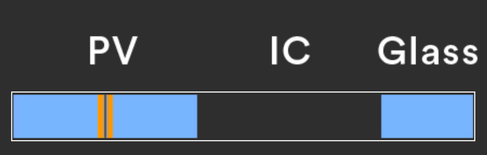
- 3 - 12 mm tempered glass high-transparency
- 0.76 mm PVB layer
- 0.21 mm PhotoVoltaic cells
- 0.76 mm PVB layer
- 3 - 12 mm tempered glass

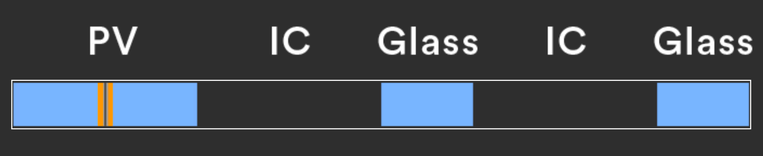
COMPOSITION



Insulation Chamber/s:

- 6/9/12/15 mm (air/argon)





Size:

Min: 180 x 180 mm
Max: 1200 x 2300 mm

Power:

Min: 150 Wp/m^2
Max: 200 Wp/m^2

BIPV ISRAEL

Solar Innova digital printing plastered imitation photovoltaic panels are a perfect solution as they constitute a range of active technological glass capable to generate electrical energy, which can be used in new construction and renovation buildings, allowing electrical autonomy and energy savings.

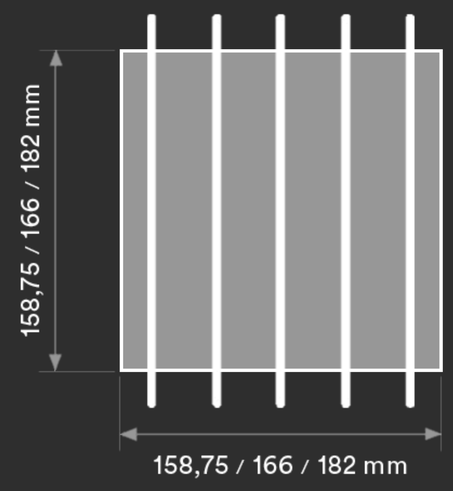
BIPV ISRAEL

BIPV

The architectural integration of photovoltaic solar panels in construction makes it possible to create glazed surfaces that, in addition to being an esthetic and functional novelty, generate electrical energy.



Monocrystalline
- sc-Si PV
- 5bb connection
- high efficiency
